

# MITEZ ANNUAL REPORT 2014

*Celebrating 20 years 1994-2014*

## THE YEAR IN REVIEW

### PRESIDENT'S FOREWORD

Like most people I would imagine we have got to the end of 2014 and we are asking ourselves where the year has gone, it only seems like the other day that we were listening to Deputy Prime Minister Warren truss giving us his insights into the issues that lay ahead for the Commonwealth Government.

It has certainly been a year like no other, I certainly don't need to be reminding everyone how hard it is out there at the moment, I think every business entity, from Federal, State and Local Governments, large mining companies, farmers and graziers down to small business owners have all been doing it pretty hard and all have had to work a lot harder and come up with more innovative ways to move forward and keep their head above water.

However I am still quietly confident for our North West region for the year ahead. I think there has been a lot of consolidating done, which will play a part in keeping us all moving forward in the coming year ahead. There is no doubt the one ingredient that will make everyone happy at the moment would be some rainfall and hopefully we will be delivered a good wet season this year.

There are some good signs out there that point to the fact that there are a lot of good things going on in our region at the moment. The live export market has been going flat out for the last month or two, there is a lot of talk that a meatworks of some description will probably be built somewhere along the MITEZ corridor, Diamantina Power and Leichhardt Stations have now been officially opened, Ernest Henry's underground mine and new headframe are now completed, Queensland Country Credit Union's new building in Townsville is nearly completed, Cudeco's Rocklands Mine near Cloncurry is nearly ready to come on stream, Townsville Port recently celebrated 150 years of service and a Free Trade Agreement has just been signed with China.

With achievements such as those mentioned as well as regional planning activities and initiatives to progress in other areas such as agriculture,

beef, supply train and transport, together they will be the ingredients for the lead-up to a positive start moving forward into 2015.

To all of our members, supporters, stakeholders and those we partner with such as the team from State Development, I wish you and your families a great festive season and a prosperous and healthy New Year.

David Glasson, President

### 2013-14 MANAGEMENT COMMITTEE:

POSITION	REPRESENTATIVE	ORGANISATION
Chair	David Glasson	Commerce North West
Mount Isa City Council	Cr Tony McGrady	Mount Isa City Council
Corridor Shires	Cr Belinda Murphy	McKinlay Shire Council
Townsville City Council	Cr Tony Parsons	Townsville City Council
Industry Representative	Vacant	Vacant
Govt. Owned Corporations Secretary	Michael Mitchell Connie Navarro	Queensland Rail Emanate Legal
Treasurer	Cameron Thompson	Queensland Country Credit Union

### CEO'S REPORT

Since our last AGM held at Townsville a year ago, it has again been an eventful year for MITEZ.

The year began with plenty of talk by the Commonwealth Government on plans to develop Northern Australia and as a regional development group. MITEZ provided input into the process as required.

**January:** The North Queensland Resources Supply Chain project was wound up with the

report's recommendations being sent onto Deputy Premier, Jeff Seeney. Some of the remaining funds were used to undertake a "North West Minerals Province Water Demand Study" with the balance of funds being set aside for additional or future work to be done as required by the supply chain technical committee.

**February:** MITEZ provided a submission to the Queensland Competition Authority highlighting concerns about privatisation of the energy supply such as Ergon and the need to maintain the CSO to keep energy costs for consumers in the north on par with consumers in the south.

**March:** At a workshop organised by CSIRO at Hughenden, stakeholders were briefed on the findings and recommendations of the Flinders and Gilbert River Ag Study and how potential irrigators could go forward and plan projects along the river. MITEZ attended this workshop.

**April:** MITEZ presented at the public hearing held at Mount Isa and in August forwarded a submission to the Green Paper. In September MITEZ responded to the Commonwealth's final report titled "Pivot North: Enquiry into the Development of Northern Australia" which is to guide the Commonwealth Government's future policies to be outlined in the "White Paper".

**May:** There was a strong push to promote up-grading the Hann Highway and a group of stakeholders from Shires in the region met at Oak Park, north of Hughenden to discuss strategies to progress the project. At the same time head of the Joint Consultative Committee on Northern Australia, and Member for Leichhardt, Warren Entsch said the proposal to up-grade the Hann Highway had been positively received and it ranked highly in their final report as one of the North's priority projects.

At our May Meeting held at Julia Creek, Deputy DG, Regional Services Ms Kathy Schaeffer officially launched the new look MITEZ branding as well as investment opportunity snapshots designed to be promoted by Trade and Invest Queensland. Visitors to the meeting included representatives from Macquarie Bank Investments and Trade and Invest Queensland.

MITEZ has since focussed resources to develop investment attraction and marketing strategies and become more proactive in seeking potential investors to the region through strengthening relationships with Trade and Invest Queensland. MITEZ project officer, Dr Mark Shadur was responsible for the project and also to develop

new branding and marketing concepts that have since been applied to most of MITEZ's material.

Also in May, we saw the departure of well-known MITEZ member Mark Roberts who was also the industry representative on the management committee. Aurizon's Tony Lucas acted in an interim capacity to fill the industry position.

**June:** Members of the Joint Consultative Committee visited Richmond at the invitation of Mayor John Wharton to inspect the proposed O'Connell Creek off-stream water storage and irrigation project and it is pleasing to see the Richmond project is ranked among the priority water projects in the Commonwealth's Agricultural Competitiveness Green Paper.

Earlier in the year our focus was to work closely with the consultants, project partners, Mount Isa DSDIP team and project chair, Cr Tony McGrady to facilitate and project manage the North West Development Strategy Study, which included a regional summit held at Cloncurry in March.

At a cost of over \$200,000 the final report was completed in May and at the invitation of Cr McGrady the study was launched in June at Mount Isa by the Premier Campbell Newman.

Since then a number of sub-committees have been formed to progress and implement the report's recommendations and action plans.

**July:** There were a number of positive announcements concerning mining and exploration with seven projects in the region winning grants to fund half of their drilling cost. Also a tender process opened for mining rare earth elements and other minerals from tailings at the Mary Kathleen mine-site. Uranium prices have since risen significantly and there is now increased interest from investors and exploration companies.

The MITEZ management committee held a strategic planning meeting in July at Townsville where they were briefed about the Queensland Government's 'Strong Choices' and plans to sell or lease the Port of Townsville, Mount Isa to Townsville rail line as well as a number of other assets.

MITEZ worked with a facilitator from Queensland Treasury receiving further information and briefings, including; a telephone link-up with the Treasurer and Mayors across the corridor and then commenced a process to submit a list of potential projects in the MITEZ region possibly to

be funded by the proceeds of the sale or lease of these assets.

Priority projects that were submitted included completing the sealing of the Hann Highway, an additional water storages in the North West Minerals Province, contribution to Richmond's O'Connell Creek off-stream storage and capital upgrades to the Flinders Highway.

**August:** On the State Government front, we saw a range of documents coming out as drafts seeking our comment such as Water Q; Infrastructure Q; Resources Q; Energy Q for which MITEZ provided input and submissions. Some of these have since been released as 30 year plans and were followed by the launch in Townsville on July 9 of the Regions Q Framework by the Deputy Premier. Approximately sixty stakeholders from across the region attended a Regions Q workshop held at Cloncurry.

MITEZ's Dr Mark Shadur accepted a position at DSDIP in Townsville and after advertising the position, Katie Schrodter was engaged to take over the MITEZ admin and project functions. Katie is well-known along the corridor having previously done consultancy and event management for a number of the Shires.

**September:** Charters Towers Regional Council has been progressing plans to develop an irrigated cropping precinct on the upper-Burdekin and is consulting with relevant Government Departments to get through the red and green tape to assist farmers on the Burdekin. There are some trials of crops including some fruits and vegetables that could eventually be produce for export. Ramon Jayo was invited by MITEZ to attend the NQIAS meeting in September to gain a better understanding of the role CSIRO can play to assist projects by providing advice, science and data.

Following the release by the Deputy Premier in July of the recommendations of North Queensland Resources Supply Chain Study, the first meeting of the supply chain technical committee was held September. This group has the task of sorting out the day to day issues that will result in achieving greater efficiencies particularly with Port and rail interface at Townsville as well as network issues associated with the rail out to Mount Isa.

BHP Cannington announced it would be affected by a demerger within the BHP Billiton group of

companies and if the demerger was approved later in the year the company would then be known as NEWCO and the new structure would better position the Cannington business to compete for capital and project funding such as further mine expansion and development projects.

**October:** Glencore reported improved profitability for its Mount Isa operations and also reported on prospects for a number of new orebodies improving the outlook for its business and life of mine. Planning and approval stages for the potential black Rock Open Cut project would also improve copper production.

Ernest Henry mine reported the operation's significant progress since the transition from open pit to underground shaft mining in June 2014, with record mine development achieved in October.

**November:** MITEZ submitted two projects for its Queensland Government funded projects for 2015 and commenced planning layout, content and associated material for the Regions Q Expo. MITEZ, RAPAD and GSD are included within the North and Central West DSDIP area that is to be promoted as one region and the groups have met to exchange ideas and plan the combined display to be open on February 13 for potential investors and on February 14 for the general public.

MITEZ's tourism representative on Outback Queensland Tourism Board, Cr Belinda Murphy was responsible for the idea to develop the Overlanders Way educational tourism project to create packages and itineraries for visiting school groups to visit centres and attractions along the MITEZ corridor (known as Overlander's Way). This project is supported by Outback Tourism and Overlanders Way Committee.

MITEZ were invited to participate in the first official underground tour at Glencore's Lady Loretta mine which is now approximately 480 metres deep and serviced by an incline. With relatively high-grade silver-lead-zinc ore, the mine, plant, admin and other facilities such as accommodation village are state of the art. This mine is typical of what may result in other parts of the North West when more world-class deposits are eventually discovered.

One such example is MMG's Dugald River project, north of Cloncurry which is one of the largest and highest-grade known un-developed deposits of zinc, lead and silver in the world. With

over 90 workers on site, initial mining trials were carried out in 2013 however due to complexity of the orebody stoping trials were held in 2014 and they are expected to be completed by early 2015. A geological and geotechnical program is now underway to review the findings in relation to the entire ore body.

The year saw a dramatic change in live cattle exports with Wellards taking over 250,000 head out through Townsville Port in the last 12 months. Also MITEZ's Northern Meatworks study was used by a Townsville delegation visiting China to assist them to attract investor interest and there have since been a number of potential investor groups visiting Townsville and a number of the Shires in the North West.

Early in 2015, Cloncurry's new \$10.6 million heavy vehicle by-pass is expected to be completed and is designed to take much of the heavy transport passing through Cloncurry away from the town centre and community areas. Mayor Andrew Daniels and Councillors are very pleased with how well this project has run and are pleased with the work so far.

For 2014, most of the region has been suffering from the prolonged drought which is putting considerable stress on businesses and communities across the corridor and it is MITEZ's belief that without water nothing much can happen when it comes to developing the region. The 2013 CSIRO report, North West Development Study 2014 and the more recent GHD study report looking future water demand in the North West Minerals Province each highlight the Cave Hill dam-site as the most likely location for a new deep-water storage.

MITEZ has plans to commission a more detailed study in 2015 to look at the best possible solution to provide water security for Cloncurry and Mount Isa to prevent the threat of future water shortages.

During the year MITEZ also participated on a number of other planning activities such as implementation of the North Queensland Irrigated Agriculture Study with a workshop in Hughenden in March; North and North West Queensland Sustainable Resources energy project (Pentland); Flinders River Ag Precinct field day at Richmond in May; Townsville City Plan and TEL strategic advisory committee meetings.

As MITEZ CEO, I wish to express my thanks and appreciation to our members, sponsors, industry

partners and colleagues at DSDIP and our own team at MITEZ for their continued support and for keeping our organisation strong as we remain one of Australia's best performing regional development groups.

Glen Graham, Chief Executive Officer

## 2014- A YEAR OF CHALLENGES

After hearing our guest Deputy Prime Minister, Hon. Warren Truss speak at the last MITEZ AGM, the year ahead began with an expectation of some good news to come about the Commonwealth Government's plans for developing the North.

During the year, MITEZ participated in the process of putting forward our region's priorities by sending in submissions, attending the public hearing in Mount Isa and also the conference held at Townsville in June.

After the release of the Green Paper in August, we are now keen to see what the White Paper has to say that is specific to the MITEZ region.

MITEZ Councillors and Mayors with Deputy Prime Minister, Hon. Warren Truss at the 2013 AGM

This year the State Government initiated a number of planning workshops such as Water Q; InfrastructureQ; Resources Q; Energy Q for which MITEZ provided input and submissions. Some of these have since been released as 30 year plans followed by the launch in Townsville on July 9 of the Regions Q Framework by the Deputy Premier. In August approximately sixty stakeholders from across the region attended a Regions Q workshop held at Cloncurry where a

range of fresh ideas were identified for developing the North West and Gulf.

MITEZ was also actively involved in our own region's planning activities facilitating the North West Development Strategy Study, which included a Summit in Cloncurry in March leading to the completion of the final report that was launched in June at Mount Isa by the Premier.

North West Strategy Study Working Group Julia Creek

During the year MITEZ also participated on a number of other planning activities such as implementation of the North Queensland Irrigated Agriculture Study with a workshop in Hughenden in March; North and North West Queensland Sustainable Resources energy project (Pentland); Flinders River Ag Precinct Filed day at Richmond in May; Townsville City Plan and TEL strategic advisory committee meetings.

Following the release by the Deputy Premier in July of the recommendations of North Queensland Resources Supply Chain Study, the first meeting of the supply chain technical committee was held in September. This group has the task of sorting out the day to day issues that will result in achieving greater efficiencies particularly with Port and rail interface at Townsville as well as network issues associated with rail infrastructure out to Mount Isa.

With the Queensland Government announcing 'Strong Choices' and plans to sell or lease the Port of Townsville, Mount Isa to Townsville rail line and a number of other assets, MITEZ was soon working with a facilitator from Queensland Treasury by providing information; organising a telephone link-up with the Treasurer and Mayors across the corridor and submitting a list of potential projects in the MITEZ region possibly to be funded by the proceeds of the sale or lease of these assets.

Priority projects that were submitted included completing the sealing of the Hann Highway, an

additional water storages in the North West Minerals Province, contribution to Richmond's O'Connell Creek off-stream storage and capital upgrades to the Flinders Highway.

Premier Campbell Newman and the Hon. Cr Tony McGrady at the launch of the North West Strategy Study at Mount Isa in June

Early this year a decision by Aurizon to restructure its operations saw changes along the corridor with the main impact on the centres of Hughenden and Charters Towers. QR reported on its progress to gain further efficiencies through track improvements at a number of key sections of the line; however total tonnages were reduced following the closure of the magnetite operations which also affected plans to construct a load-out facility near Cloncurry during the year.

Another area where MITEZ focussed resources during the year was to develop investment attraction and marketing collateral and become more proactive in seeking potential investors to the region.

Deputy Director General, Kathy Schaefer launches the new MITEZ corporate branding un Julia Creek

At our May Meeting held at Julia Creek, Deputy DG, Regional Services Kathy Schaefer officially launched the new look MITEZ branding as well as investment opportunity snapshots designed to

be promoted by Trade and Invest Queensland. Visitors to the meeting included representatives from Macquarie Bank Investments and Trade and Invest Queensland. MITEZ project officer, Dr Mark Shadur was responsible for the project of developing the new-look marketing material which has since been applied to most of MITEZ's material.

In August Mark accepted a position with State Development at Townsville and he quickly swung into action continuing to promote investment attraction initiatives across the North and North West and in September organised an informative investment attraction workshop that was attended by Cr John Wharton and MITEZ CEO, Glen Graham.

During the year MITEZ provided support to assist groups such as the North West Development Strategy; Flinders River Ag Precinct; North Beef; Charters Towers Ag Project; Hann Highway development; Townsville Enterprise; Overlanders Way and OQTA.

McKinlay Shire Mayor Cr Belinda Murphy presented with the Local Government Award for Tourism at the 2014 Outback Queensland Tourism Awards

With the year coming to a close and despite the terrible drought conditions experienced across much of the State and especially in the North West, there has been some good news stories coming out of the region.

Examples include restoration of the live cattle export business, the possibility of an abattoir somewhere along the corridor, the Townsville Port celebrating 150 years, completion of the Diamantina and Leichardt Power Stations and Cloncurry's Weir; release of the CSIRO report on the Flinders River; the free trade agreement with China and most likely India which will in time provide benefits to the mining, agriculture and grazing industries.

Diamantina Power Station Mount Isa, officially opened December 3, 2014

This year has not been the best for Cloncurry Mayor, Cr Andrew Daniels who is recovering from a health issues and on behalf of all of our MITEZ members, we wish him a speedy recovery and look forward to seeing sitting around our table next year.

Despite the poor wet season Cloncurry's new weir was filled in February providing additional water supply for the town

## THE MITEZ REGION

### OVERVIEW

The Mount Isa to Townsville Economic Development Zone (MITEZ) extends 920 kilometres inland from its most eastern point on the Great Barrier Reef, across North Queensland over the Great Dividing Range, and across the outback of North West Queensland to the Northern Territory border. The region covers approximately 16% of Queensland's total land area.

The MITEZ region encompasses the seven Local Government Areas (LGAs) of:

- Mount Isa.
- Cloncurry.
- McKinlay.
- Richmond.
- Flinders.
- Charters Towers.
- Townsville.

The MITEZ region acts as a vital integrated transport corridor, connecting the region and its extensive mineral and agricultural production to the rest of Queensland, Australia and internationally via road, rail, air and sea links.

#### MEETING ATTENDANCE:

March	Charters Towers	31
May	Julia Creek	32
August	Mount Isa	36
October	Richmond	22
December	Townsville (AGM)	35

### POPULATION

As of June 30, 2013 the MITEZ region hosted a resident population of 231,679 persons with an average age of 34.7 years. Over the past five years population growth has averaged 2.1% per annum, with growth concentrated in the Townsville and McKinlay LGAs.

### Population and Average Age

Local Government Area	Resident Population (June 2013)	Five Year Average Annual Pop. Growth	Average Age (2012)
Townsville	189,238	2.3%	34.7
Mount Isa	22,779	1.3%	32.0
Charters Towers	12,491	0.6%	37.9
Cloncurry	3,413	0.6%	34.4
Flinders	1,828	-0.1%	40.9
McKinlay	1,085	1.8%	35.8
Richmond	845	-1.1%	38.2
<b>MITEZ Total</b>	<b>231,679</b>	<b>2.1%</b>	<b>34.7</b>

Sources: ABS (2014a) Cat No. 3218.0, ABS (2014b) Cat No. 3235.0

The Townsville LGA is the major population centre for the region with 81.7% of residents, followed by:

- Mount Isa (9.8% of MITEZ population).
- Charters Towers (5.4%).
- Cloncurry (1.5%).
- Flinders (0.8%).
- McKinlay (0.5%).
- Richmond (0.4%).

The LGAs of Townsville, Mount Isa, Cloncurry and McKinlay possess younger average ages than the Queensland average of 37 years. By contrast, Charters Towers and the agricultural centres of Flinders and Richmond possess notably higher average ages than Queensland as a whole.

## REGIONAL ECONOMY

### Gross Regional Product

Over 2012-13 the MITEZ region generated Gross Regional Product (GRP) totalling \$19.5 billion (6.7% of the Queensland economy). Over 2012-13 the region recorded strong growth of 11.6%.

Over the past five years GRP growth has averaged 1.4% per annum compared to 2.5% per annum for Queensland as a whole.

MITEZ Region GRP (\$M)

Source: AEC

## Industry Value Added

The major industry sectors in the MITEZ region include:

- Mining 37.2% of Industry Value Added (IVA, i.e. contribution to GRP).
- Public administration and safety (9.2%).
- Construction (7.3%).
- Health care and social assistance (5.9%).
- Transport, postal and warehousing (4.4%).

The breakdown of MITEZ industry sectors is provided in the chart below.

MITEZ Region Contribution to IVA (2012-13)

Source: AEC

The Townsville LGA provides a major contribution to the MITEZ regional economy, with approximately 55% of IVA in 2012-13. Accordingly, Townsville's industry structure strongly influences the MITEZ regional industry structure.

When the Townsville LGA is excluded, the industry contribution to GRP changes significantly. Across the six LGAs from Mount Isa to Charters Towers the major contributing industries are:

- Mining (76.3% of IVA).
- Agriculture, forestry and fishing (4.9%).
- Construction (2.9%).
- Manufacturing (2.1%).

## Gross Regional Product

Over 2012-13 the MITEZ region generated Gross Regional Product (GRP) totalling \$19.5 billion (6.7% of the Queensland economy). Over 2012-13 the region recorded strong growth of 11.6%.

Over the past five years GRP growth has averaged 1.4% per annum compared to 2.5% per annum for Queensland as a whole.

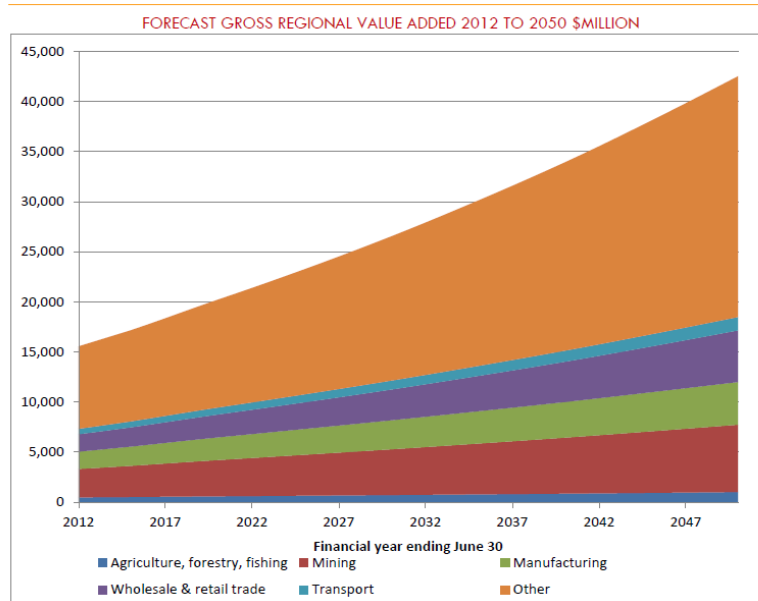

#### MITEZ Region Contribution to IVA (Excl. Townsville LGA)

Source: AEC

The MITEZ region is poised for substantial growth over the longer term. Forecasts for Gross Value Added (GVA) growth have been developed for the seven LGAs in the region for the MITEZ 50-Year Freight Infrastructure Plan.

It is anticipated that GVA will grow by almost 150%, from an estimated \$15 billion in 2011 to approximately \$40 billion in 2050, as shown in the following chart.

Source: Adapted from the MITEZ 50-Year Freight Infrastructure Plan drawing on data from the Queensland Treasury Office of Economic and Statistical Research

The minerals sector is forecast to grow by over 100%, from \$2.2 billion to \$4.5 billion during this time.

## EMPLOYMENT

Health care and public administration are the largest sectors of employment in the MITEZ region followed by retail trade, construction, education and training, manufacturing, accommodation, and mining.

Townsville is the major employment centre in the region with over 80% of employment occurring within the Townsville LGA.

Mining is the dominant employment industry in the Mount Isa, Cloncurry and Charters Towers LGAs, while agriculture is the major employment sector across the Mid-West LGAs of McKinlay, Richmond and Flinders.

## OCCUPATION

The main occupational groups across the MITEZ region are technicians and tradespersons, professionals, and clerical and administrative employees. The MITEZ region as a whole features a strong balance of worker skills, with no occupational sector contributing more than 17.5% or less than 9.3% of total employment.
